What are finishes?

The outermost layer of a product, finished to your specification. The thousands of options available to you fit into four primary types.

Fabric

Tackable
1000+ options
Carnegie
DESIGNTEX
maharam
kvadrat
Knoll
Guilford of Maine

Paint

Factory-applied
Color-matching
*SHERWIN
WILLIAMS.*

Print

Custom artwork
300dpi

Copolymer

Highly durable
Standard & custom colors
KYDEX

Wood-look

A copolymer layer with photo-realistic wood grains and colors. Looks great with our dark brown NAF cores.

Product identification

Conwed has been around long enough that our finishes have developed their own reputations.

Paint your projects however you please,
no hue is off-limits.

Custom print

Acoustic Art

Recreate a work of art, use
your own logo, or assemble
a panoramic display.

Copolymer

Metro Rebound

KYDEX

Woodgrains and solid colors are all available on a material strong enough to take a stray soccer ball.

Note ► This material can be added underneath fabric. Giving you the look of designer textiles, and the strength of copolymer.

Eurospan Fabric

Product ▶ Eurospan | Ceiling & Wall
Finish ▶ Classic Cream & Custom print

Prince of Peace Church often has its sanctuary open to the public for quiet prayer and meditation. When they set out to build their current site, they wanted to ensure that the massive space created by the light well wouldn't also create massive noise.

Knowing the central pillars would wrap around the sanctuary and lean inward, the architect made perfect use of Eurospan to cover the smooth surfaces and absorb ambient noise.

To prevent slap-back ►
echoes from bouncing off
the central wall behind
the altar, custom-printed
Eurospan was used to
create the murals.

Riverfield Recording Studio

- Product ▶ Cloud reflectors
- Finish ▶ Guilford 2100
Silver Neutral 406
- Mounting ▶ Aircraft cable

This art-centric high school wanted a state-of-the-art recording space for their 20+ bands. Naturally, Conwed's newly redesigned curved reflectors were part of the solution.

Reflectors can be
ganged together
in any direction to
create larger shapes

Respond A
Express Hanging
System

The Mullins Transportation Design Center wanted an environment that felt focused, clean, and calm. A careful choice of fabric was used to compliment their intentionally monochromatic space.

Baffles often run parallel to strip lighting. Here, they're perpendicular and suspended higher than the lighting; creating a layered and subdued look.

Product ▶ Ceiling Panel | Fabric

Finish ▶ Classic white

Mullins Library

During the renovation of their library, University of Arkansas wanted to retain the massive joists, but use them acoustic solutions that could also diffuse light.

Tucked into the ceiling you'll find ceiling panels wrapped in a light-reflective fabric, with upward-facing lights suspended just beneath them.

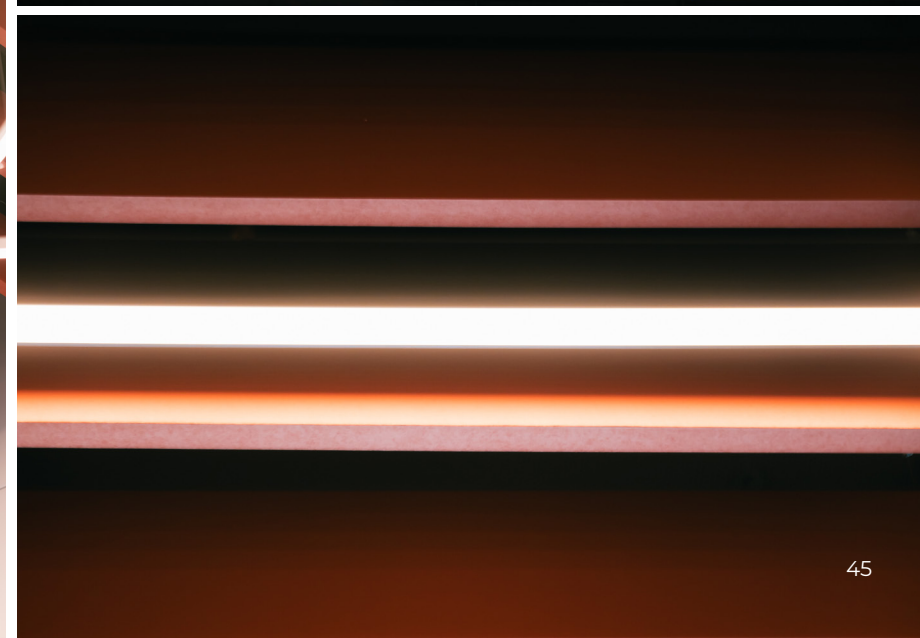

Union Hall

Product ▶ Baffle | Paint
Foundations
Mounting ▶ Express Hanging System

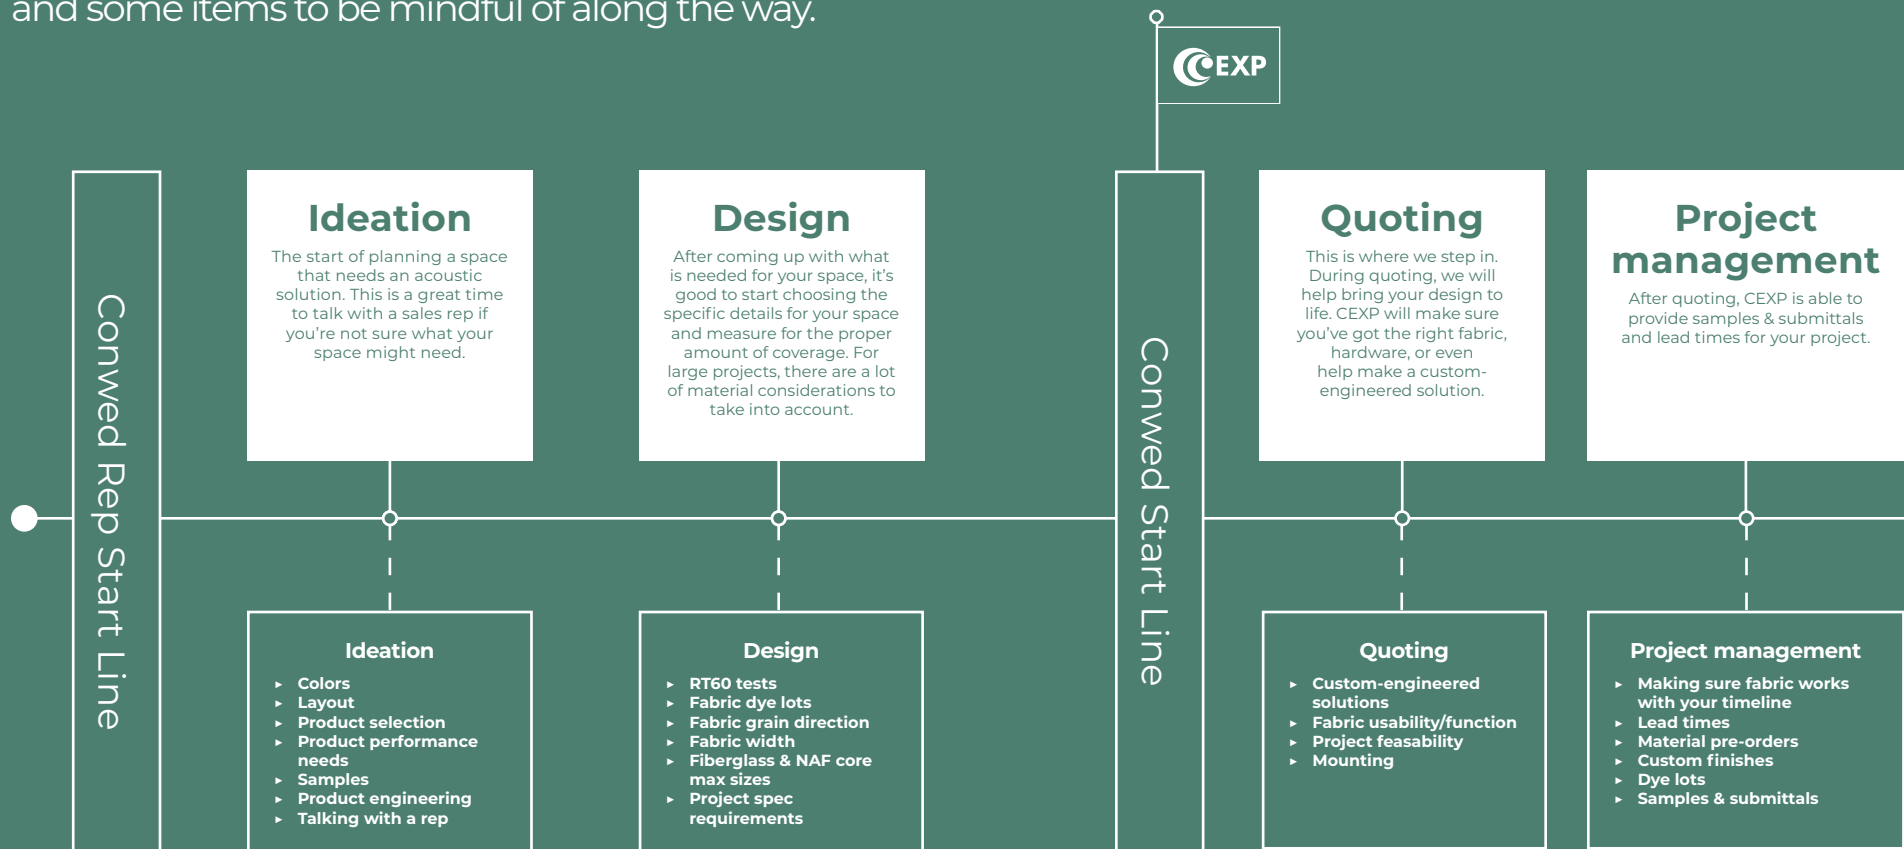

Twin sets of 28 baffles cover the ceiling, growing wider as they reach the main entrance of this tall and slim space. Combined with swirling lights suspended below, this space creates an immediate sense of awe.

The paint color was carefully chosen to match the rear wood paneling, making the baffles feel like they are a part of the hard surfaces in the room.

Feeling inspired? Not sure where to start?

Here are all the major steps in the average project, and some items to be mindful of along the way.

Shop drawings

At this point, shop drawings are created. This includes the final layout & field dimensions. Shop drawings can either be provided or CEXP is also able to create them for you.

Purchasing & production

Once the project is outlined & shop drawings are approved, materials are able to be purchased for production. At this point Conwed assigns a ship date for the project.

Check out [Lookbook 01](#) and read about how CEXP was able to help remotely coordinate the installation of 885 unique wall panels.

Installation

Once the project is shipped, it arrives on-site to be installed. We don't install but we can point you in the direction of some qualified installers. Conwed has install guides available for our products & can also provide installation support.
