What are finishes?

The outermost layer of a final product, made to your specification. Our finishes, while vast, can break up into four categories.

Fabric

Tackable

1000+ options

Carnegie

DESIGNTEX

maharam

kvadrat

Knoll

Guilford of Maine

Paint

Factory-applied

Color-matching

SHERWIN WILLIAMS

Print

Fully custom

300dpi

Copolymer

Highly durable

Colors & wood grains

KYDEX

Product identification

You'll notice simpler labels alongside the older product names you may have heard before. No matter what product name you submit in a spec though, we'll handle it.

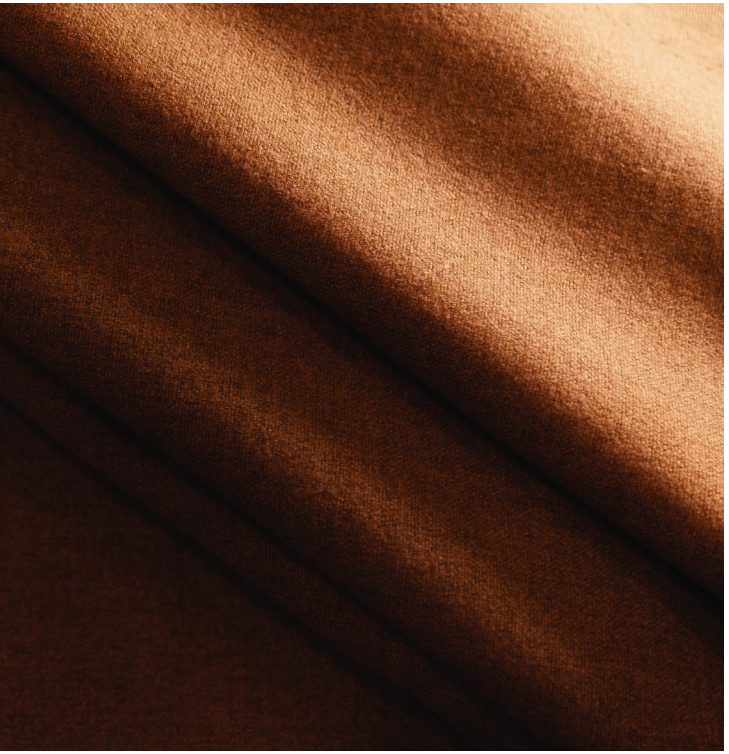
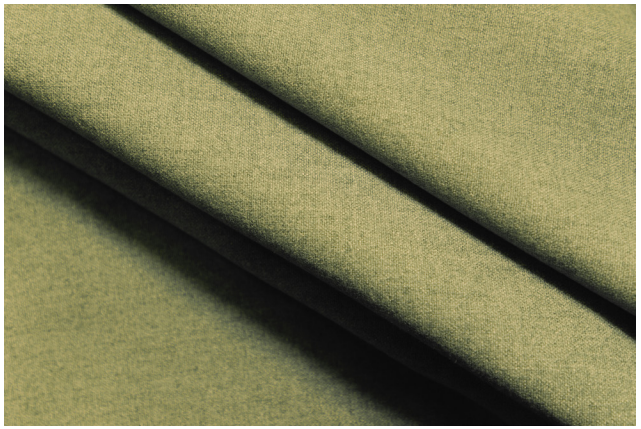
Fabrics

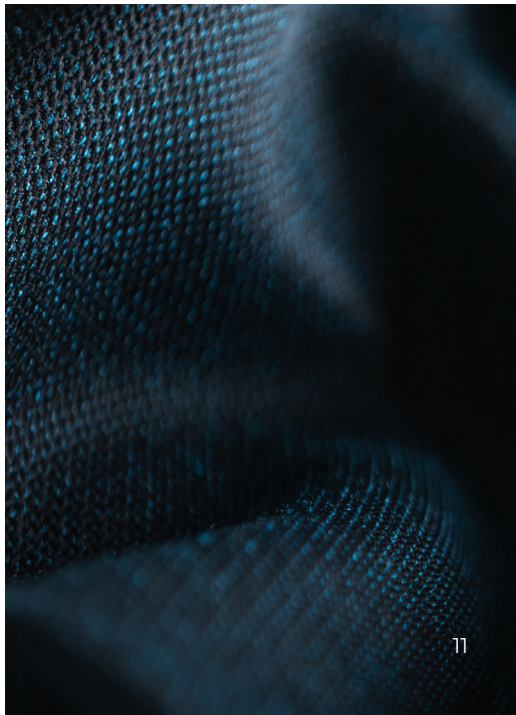
Carnegie DESIGNTEX maharam kvadrat Knoll Guilford of Maine

We partner with the top textile suppliers so that your panels can match your mood boards.



Need to see something for yourself? contact cexp@conwed.com for all your sampling needs.

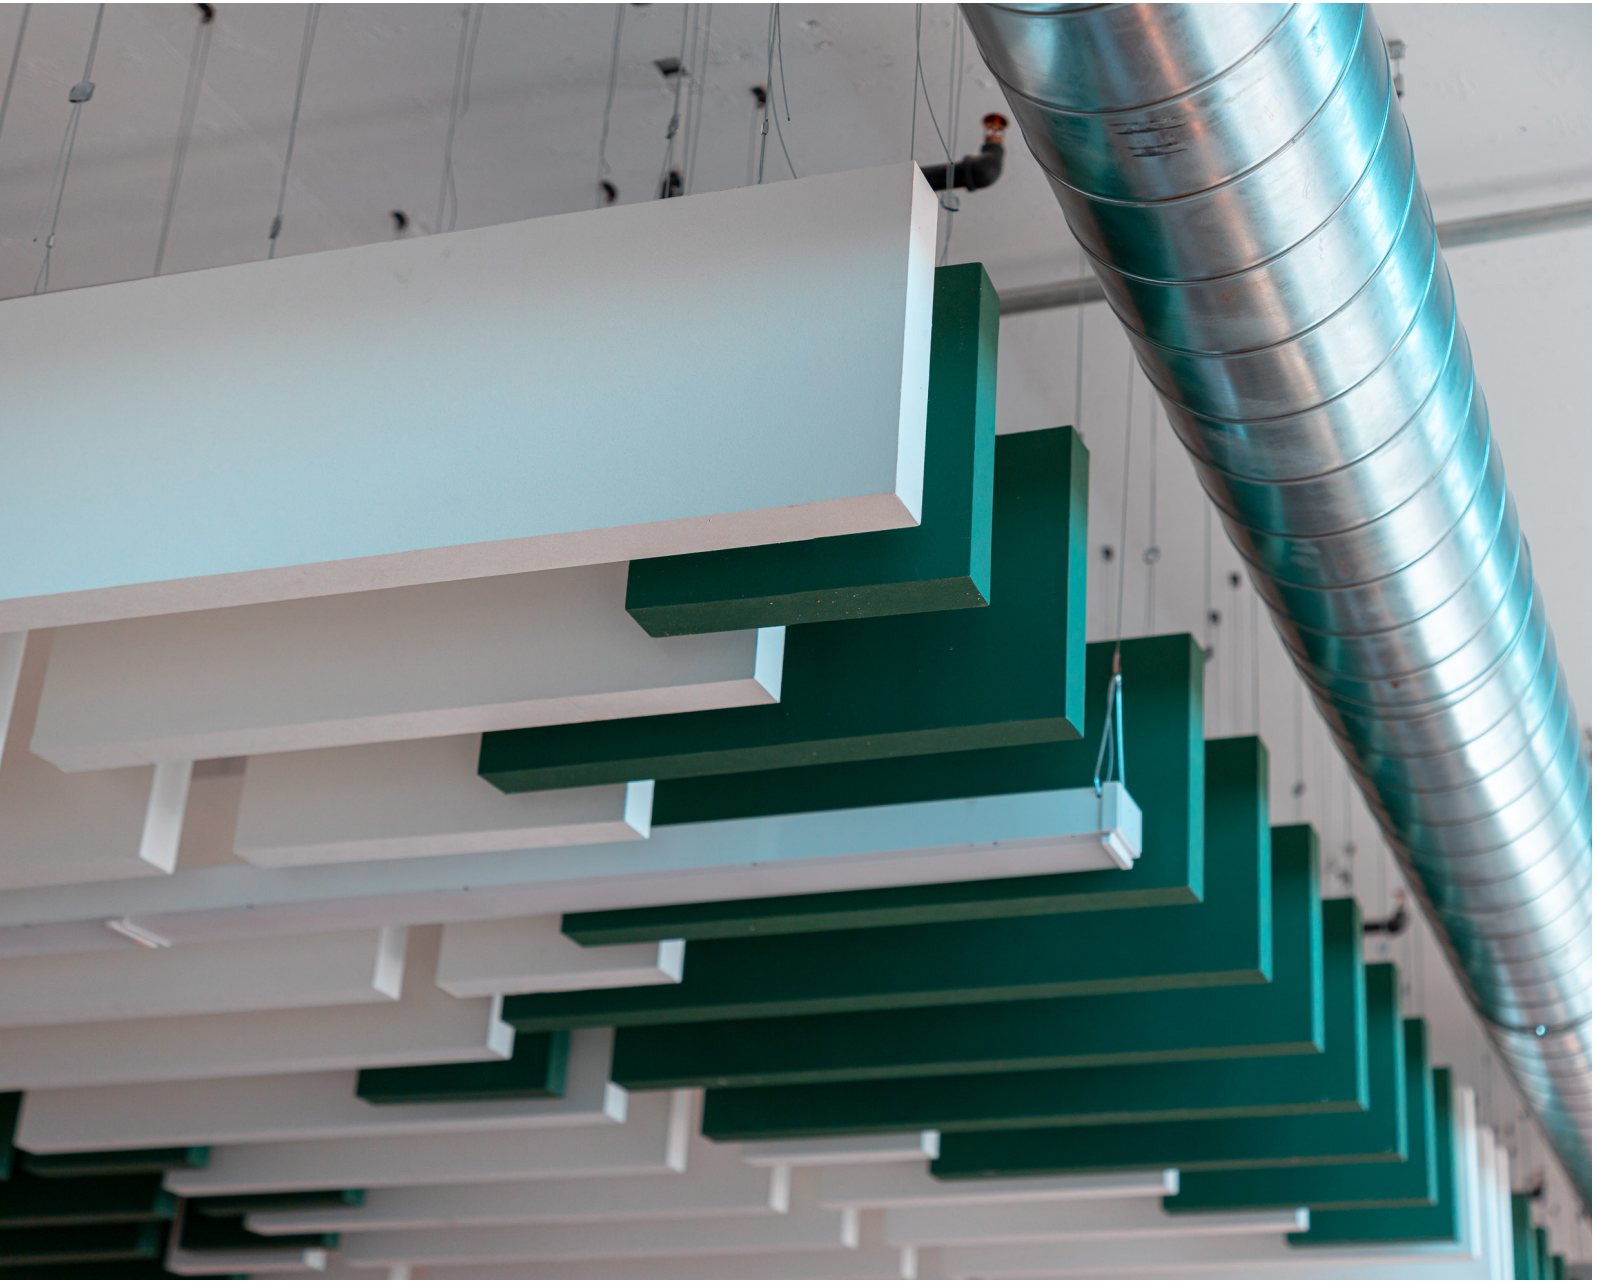




Paint

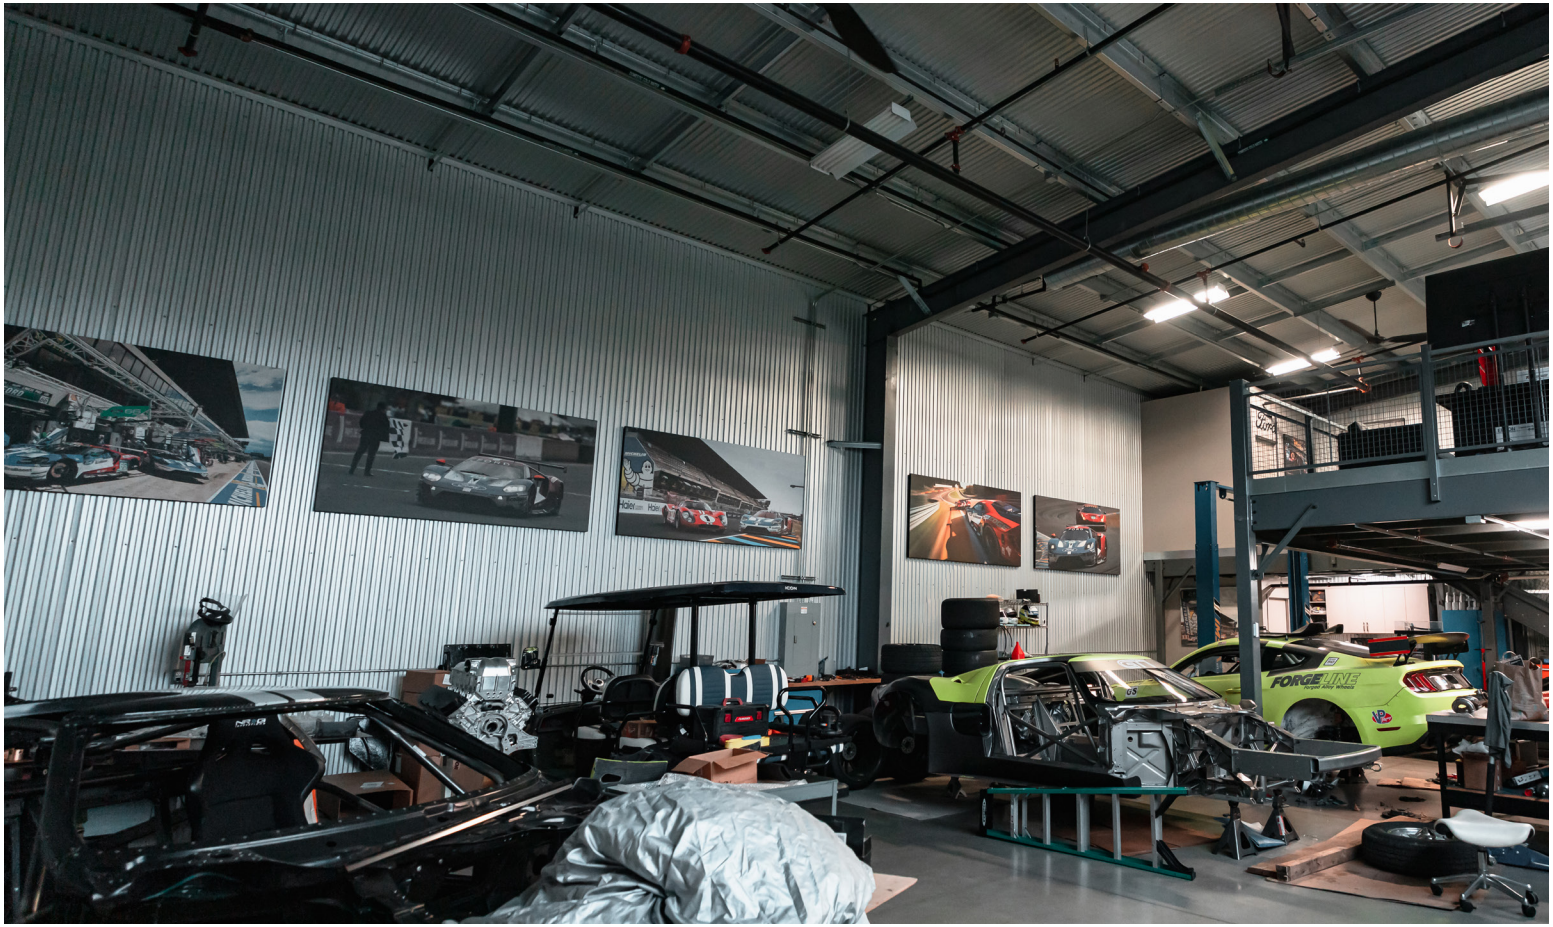
SHERWIN WILLIAMS®

Working with Sherwin Williams allows us to paint your projects however you want, whether that be a trending color, or color-matching your company logo.



Print

Give your acoustic solution a truly unique look by recreating a work of art, adding your company's logo, or using larger images spread over several panels to create a panoramic display.



FORGELINE

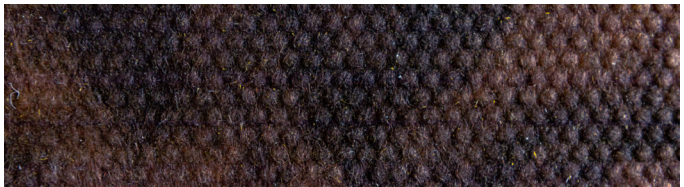
Copolymer

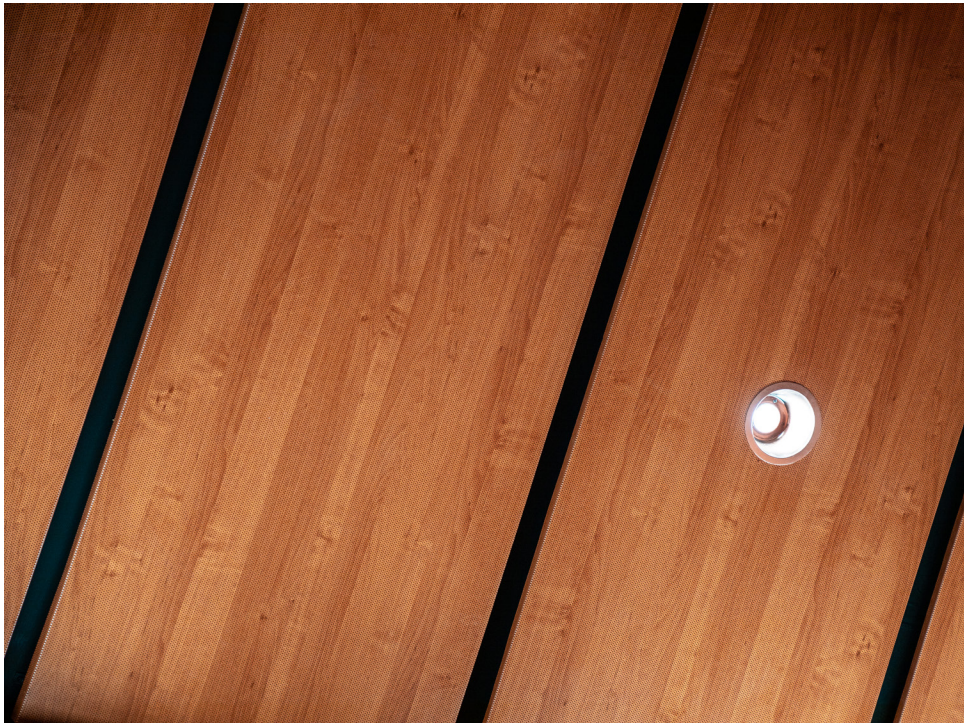
KYDEX

Get a custom color, make it a woodgrain, or use it as a backboard. Copolymer can do it all.

The perforations go great with our LEED-friendly NAF core.

NAF ▸





Now let's see them in action.

Here are some recent examples of each finish looking its best.

Chicago Parks Department

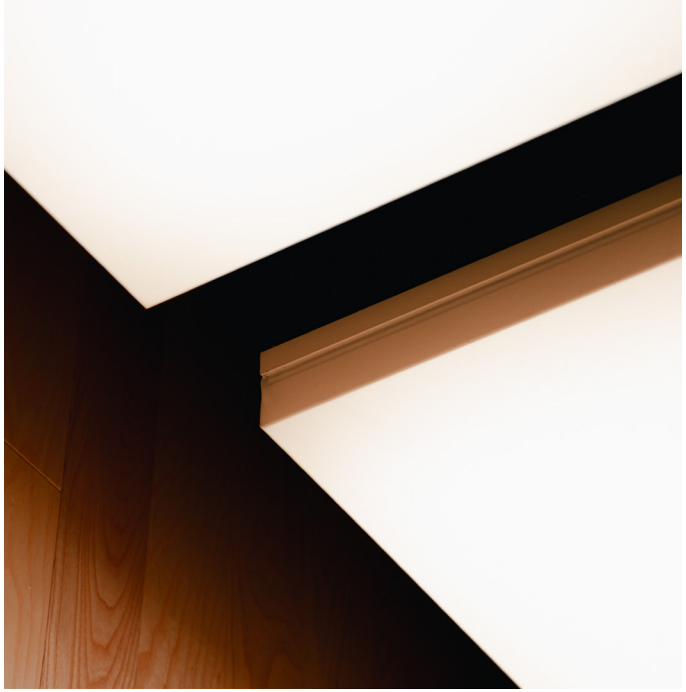
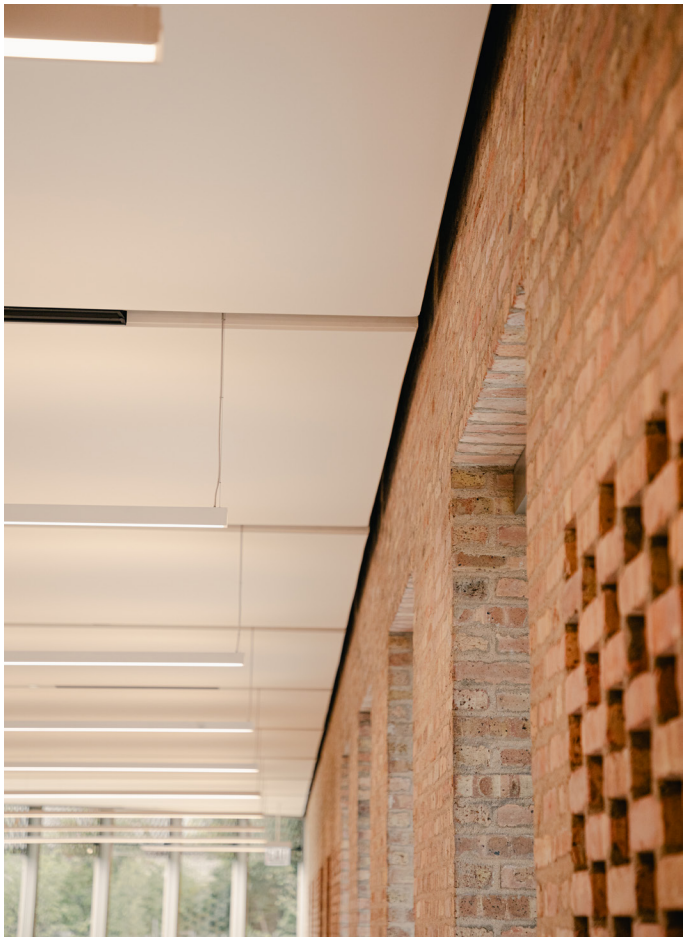
Product ▸ Eurospan Ceiling

Finish ▸ Back-lit Prime White

Mounting ▸ Eurospan Track





Eurospan was used to make it all happen.

Back-lit sections created a massive light well above the entry stairs, and seamless acoustic ceilings with room for fixtures and skylights were spread throughout the workspaces.

- Eurospan is a stretch-fabric acoustic solution that can create massive discrete acoustic surfaces, or be used to make the centerpiece of a space. conwed.com/eurospan.

To keep the focus on reused bricks from historical Chicago buildings, this project's acoustic ceiling was kept minimal and clean using Prime White.

Prime White is one color of Eurospan Prime, an ideal stretch-acoustic fabric designed in-house by Conwed engineers.

Product ▸ Wall panels | Fabric A & IR (Respond)

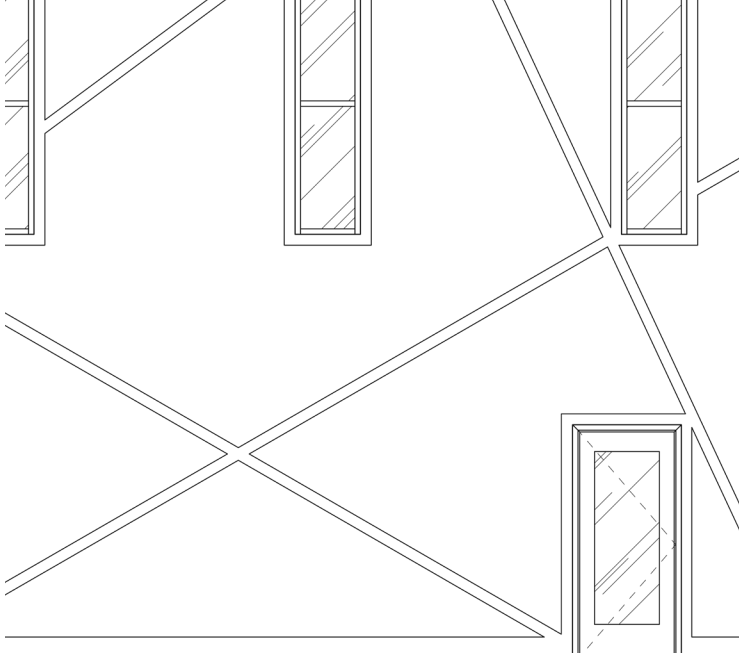
Finish ▸ Maharam Messenger 094, 095, 046

Mounting ▸ Impaling clips

Montwood

Perfect from idea to install.

We were given CAD files of the first iteration of plans and translated them into the ideal amount of custom-shaped panels for the project.



We created a barcode system.

Every panel was scanned and monitored through the production process to ensure the deliverables were exactly as specified. Until then, we had no need for tracking projects this way, now it's the standard.

Installation was coordinated across the country using the barcode system and handled by our CEXP team. 885 unique panels were made for this project, and each stuck the landing in a perfect install.

West Governor University

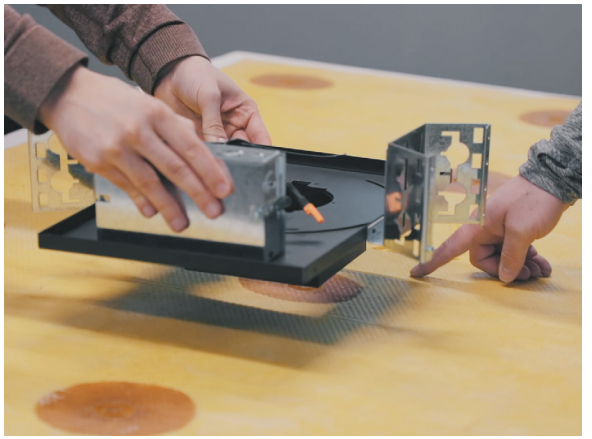
Product ▸ Clouds | Paint | A (New Dimensions)

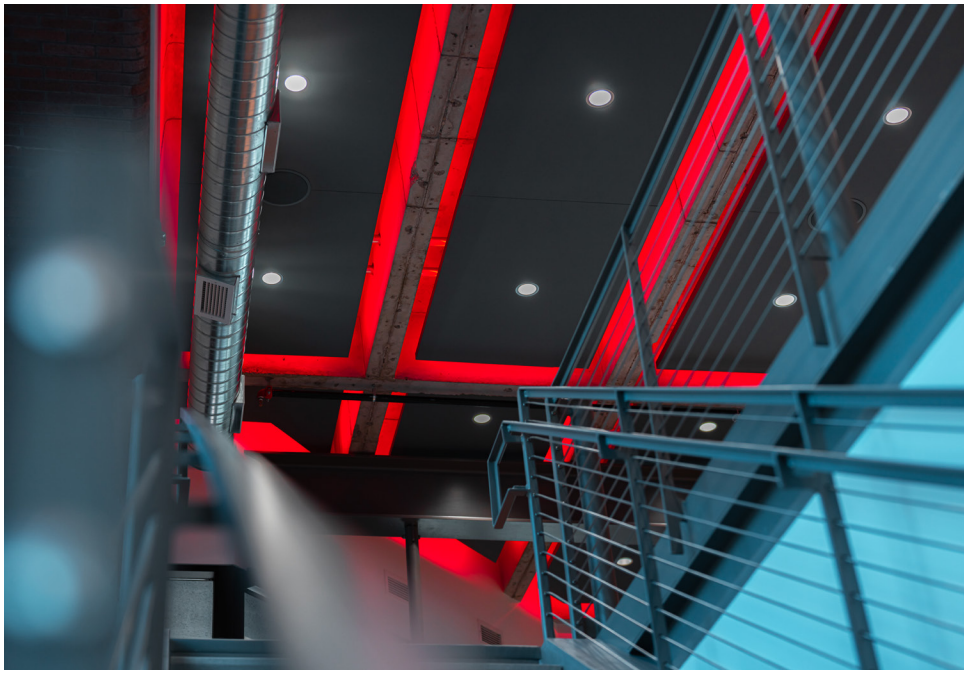
Finish ▸ Custom paint color WGU Grey

Mounting ▸ Acoustical cloud anchors

Conwed clouds were chosen for this renovation for their structural strength, the custom paint was a bonus.

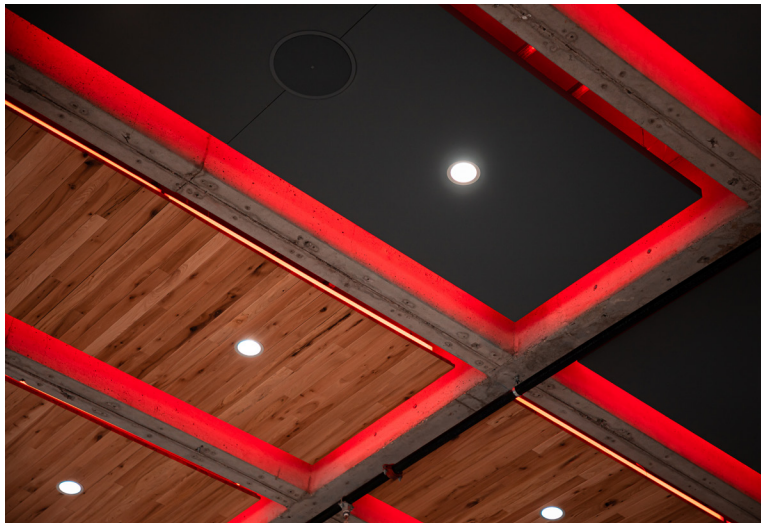
Each cloud was perforated to accommodate can lights, suspended lights, and a 14" speaker. Hidden atop the cloud, electronics for the speakers, and RGB lights we mounted directly to the acoustic core.

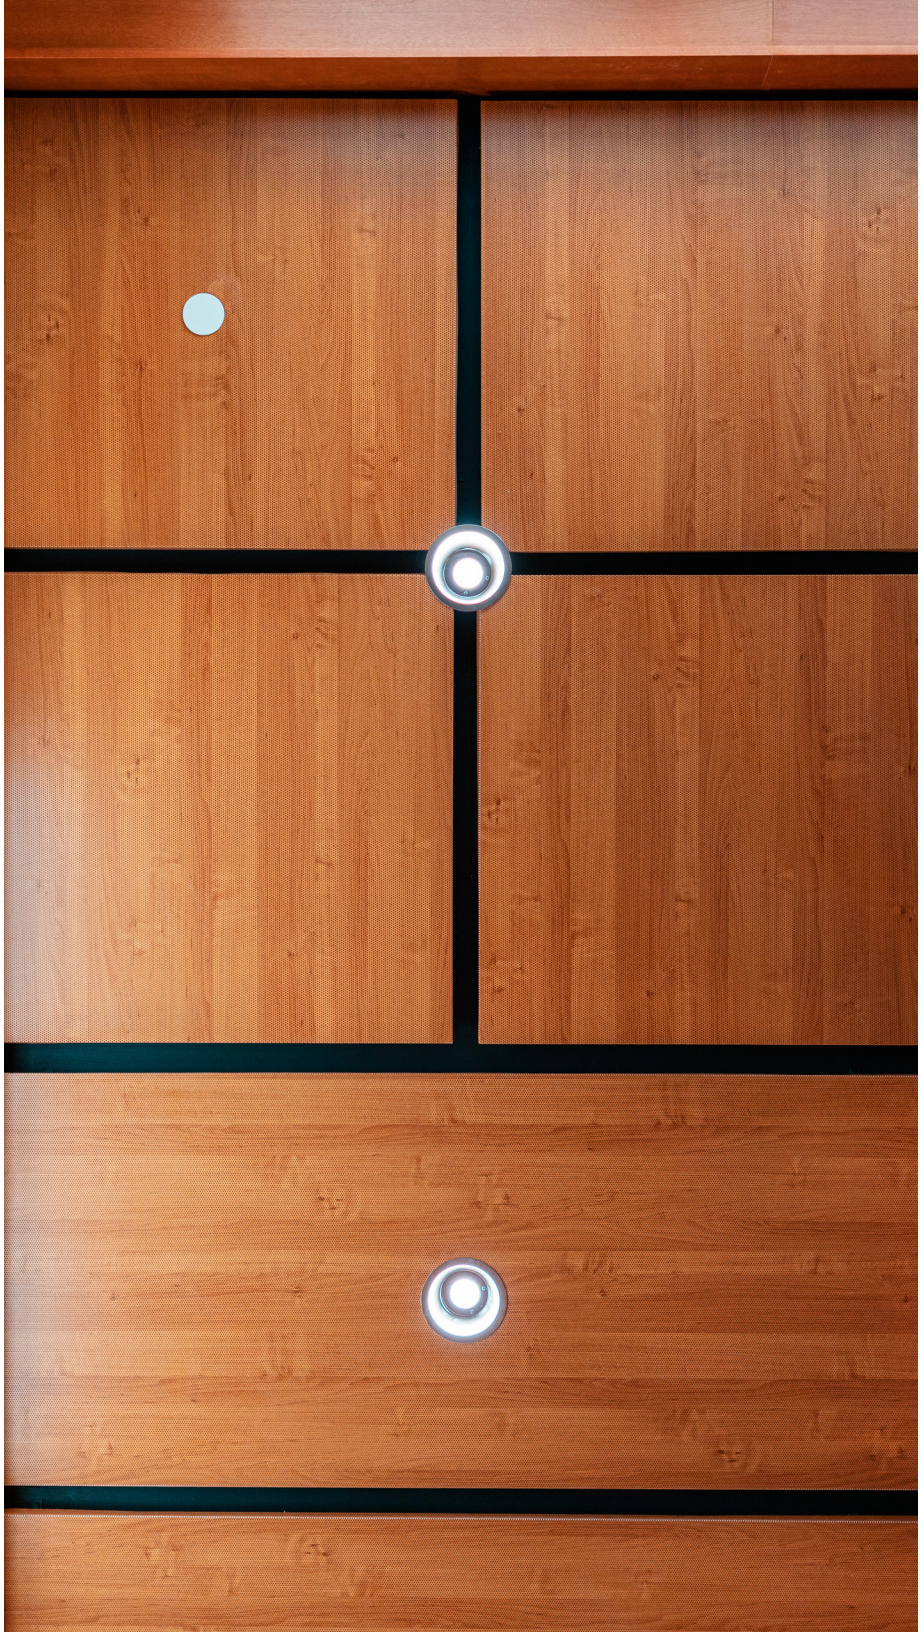




Watch the light show come together.

conwed.com/ major-upgrades-at-wgu.





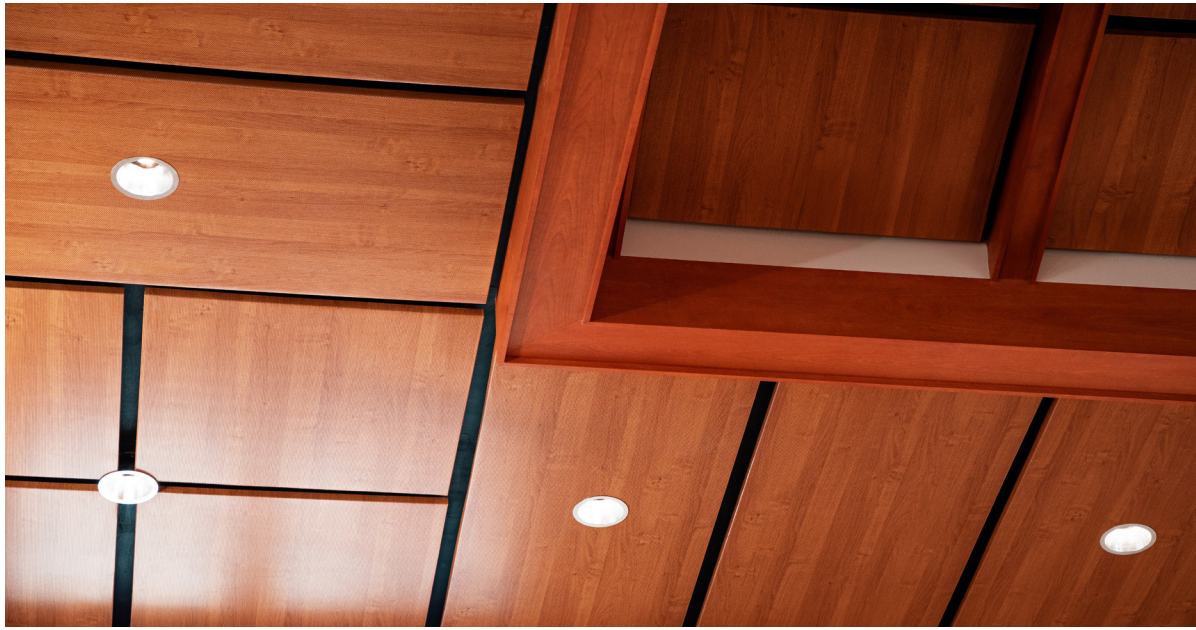
Hillside school

Product ▸ Ceiling Panel | Copolymer (Metro Rebound)

Finish ▸ UrbanForest Summer Flame

Mounting ▸ Z-bar to z-bar

Hillside had a massive common space, and music room that needed a lot of acoustical treatment. They didn't want a typical fabric panel though. So, we showed them our UrbanForest Collection.



We work to make any idea possible.
