

Flat Reflective Cloud

Reflective Clouds are assets in spaces where audio and comprehension are critical, but a strong design element is still desired. Reflective clouds bounce sound to the hard to reach areas of an auditorium or theater, allowing audio engineers to make every seat in the house a sweet spot

Specialized

Conwed's Specialized products do more, or even the opposite, of traditional noise-absorbing acoustic panels. Reflect, diffuse, block, and balance sound in any environment with these customizable solutions.

Core construction

Flat panel is an MDO (Medium Density Overlay) plywood, sometimes backed with dimensionally-stable 6-7 PCF fiberglass board

1. Adjusting arm
2. 3/4" MDO
3. U-channel
4. Panel finish

Acoustic performance

The NRC of the products are determined from an average of sound absorption coefficients, obtained from tests conducted according to ASTM C423 procedures in an NVLAP accredited laboratory.

Max size availabilities

Custom size is our standard

Thickness	4'x8'
3/4"	✓

Edge details

- Standard edges are square and bevel.
- Edges can be built up to hide mounting.

Mounting

Reflector hardware is standard for flat reflectors.

Finish

A wide variety of fabrics are available from all major brands, including:

Carnegie **DESIGNTEX**
maharam **Knoll**
Guilford of Maine

Fire Rating

Conwed products meet or exceed ASTM E84 standards for smoke development and flame spread on a component level.

Standard Durability

This product has a durable core construction, ideal for out-of-reach areas.
